

# MICHAEL'S WOODSHOP

## COME BUILD WITH US @ SNYDER

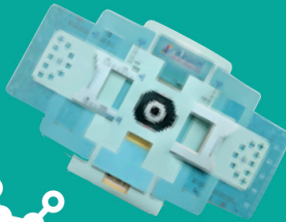

Choose one of four projects to build.

- Level 1) A tic-tac-toe game
- Level 2) A small tool box
- Level 3) A large tool box
- Level 4) A Wren bird house

No experience necessary since all activities will be guided by an expert staff.

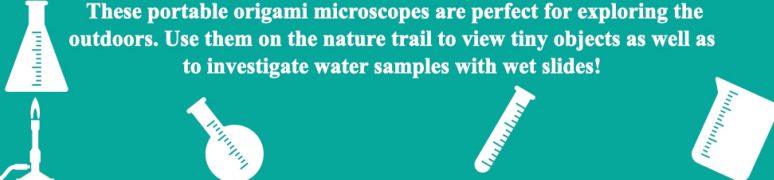

# Origami Microscope

Invented at Stanford lab, these nifty origami microscopes have a magnification of 140x.

Every youth who attends Family Camping will receive a FoldScope. Construction takes about 1hr.

These portable origami microscopes are perfect for exploring the outdoors. Use them on the nature trail to view tiny objects as well as to investigate water samples with wet slides!

# STEM FOAM FUN

Youth will learn about exothermic reactions! In this chemistry activity, youth will combine two liquids and observe four reactions!

Specifically, we will show you how to combine equal parts of tertiary amine and isocyanate, which will: **change color**, generate heat, grow to 16x the original volume, and change state of matter.

# SKY TO GROUND

Test your eye and hand coordination!  
Fly a drone or, drive a remote control car to see Camp Snyder from a different view.

For Scouts 13+

# WANT TO CLIMB?

Scouterhorn Climbing  
Enjoy our 20ft wall

# TEST YOUR AIM

Test your skill in shooting a BB gun at official targets.  
Who is the best shot in the family - Dad, Mom or the youngest shooter?  
All safety equipment is provided and experts guide you through the experience.
